image guided procedures used for the diagnosis and treatment of multiple medical and surgical conditions. I have special interests in alternative interventions for the treatment of symptomatic uterine disorders, venous disease, critical limb ischemia and palliative procedures related to oncology. I provide a clinical service which evaluates, manages and follows up patients in need interventional procedures. My goal is to perform the latest interventional techniques to improve patients' quality of life. I am also focused on reducing adverse outcomes or protracted recovery related to these procedures.
